### **Short description of the speaker**

Managing Director of ZinCo Singapore Pte Ltd

### **Biographical details or background information**

Started in Singapore since March 2003, ZinCo Singapore serves the green roof landscape industry in the eleven ASEAN countries through the distribution of the ZinCo range of green roof systems and accessories and provision of consultancy services in green roof technology. To date, ZinCo Singapore was involved in prominent projects in Singapore including the Subaru All-Wheel Driving Rooftop Garden, Fusionopolis and the Changi International Airport Terminal 3. In Manila, Philippines, ZinCo Singapore is involved in the on-going 15000 sqm of intensive green roof at the SM development at North Edsa shall be the largest of its kind.

### **Fusionopolis, Singapore – A Green Roofer`s Perspective**

Fusionopolis, a science and technology powerhouse for Singapore, brings together, under one roof, research scientists, engineers and technology experts from the public labs of the Agency for Science, Technology and Research (A\*STAR) and those from the private sector. Fusionopolis is also a point of convergence where companies with capabilities in infocommunications and interactive and digital media come together to test-bed new concepts and products.
