

In-built Landscapes

Dorota Rudawa

Landscape Architect; RS Architektura Krajobrazu

Poland

www.krajobraz.com.pl

Short description of the speaker

Landscape architect, urbanist, leader of the design practice for 12 years, traveler & photographer.

Biographical details or background information

Having gained international professional experience in The United Kingdom and The Netherlands, Dorota Rudawa together with Mirosław Sztuka established in 1996 *RS Architektura Krajobrazu* landscape design practice based in Konstancin near Warsaw.

From its inception the practice has specialized in designing modern landscapes for retail and entertainment centres, office buildings and housing estates. Participation in the Royal Castle Gardens Restoration Project (Warsaw, Poland) and the presentation of a show garden "Garden of Nurturing Water" on the Two Shores Festival, in Strasbourg, France has proven our versatility.

Since 2004 Ms Rudawa has been successfully leading her own practice where a number of modern Green Roof Landscapes has been designed. The scope of practice landscaping services is continuously expanded to include infrastructure - especially surroundings of airports and sport stadiums.

In-built Landscapes

I would like to present five projects by RS Architektura Krajobrazu, that have been built on underground garages and roofs of multi-storey buildings. They all are located in strongly urbanized area but have various functions and styles.
